

August Newsletter

PC: Melissa Davis

Telephone Cooperative, Inc

- For those driving by our office every day and are curious about our office construction project, know we have started co-locating with AT&T. This project includes the Earth Station located across the street from our facility. The new addition work to our building should be complete in September, according to General Contractor Greg Harris. AT&T should complete site work in August.

USDA Reconnect Project

- Our Cooperatives Broadband project is nearing the end of the preliminary phase of environmental work. It is very exciting to see this job getting another step closer to us being able to provide high speed, affordable internet over fiber to every home in our service areas.

Cellular Partnership

- Our new 4G LTE Cellular Project has been tuned up in Naknek, King Salmon, South Naknek, Dillingham and Egegik. Our construction contractors will begin the process to complete removal of old equipment as well as build out in our outlying villages in the coming weeks. There has been continued optimization of this new system and is overall performing well. The roaming out of our area and in the lower 48 is the best. Also note this fall, we will have the ability to provide support for iPhones.

Announcements

Monthly Board Meeting
Tuesday, August 1 @ 6pm

Back to School!
Wishing all students a great school year

Dial Before you Dig

If you are planning on digging or doing any construction, please call us for a free locate. We require a 2 day notice to locate before you start your digging project.
