Telephone Cooperative, Inc

- Bristol Bay Telephone would like to introduce our new service, Webnet. Webnet is a fixed wireless service that will provide WIFI to all community members and visitors. We will have many locations when this project is completed. As of now, Webnet is currently available at the Bristol Bay Telephone office and Eddie's Fireplace Inn. With this service, you will be able to connect to a WIFI network, pay by the hour for fast reliable internet, and move about locations that offer this service.

Cellular Partnership

- Cellular renewals for the 2023 season have been mailed out. Please keep an eye out for yours. If you did not receive yours, please give our office a call, as we might have the wrong address on file.
- Our current cellular project, which is still under construction, will allow AT&T and Verizon customers to roam off Bristol Bay cellular towers. AT&T and Verizon customers must have the roaming feature through their cellular providers in order to use this service. The service is scheduled to be available in May 2023.
